MOHAMED FADHIH

Frontend Developer | my-portfolio-seven-tawny-79.vercel.app

Melbourne, VIC | 0477 126 767 | mdfadhih377@gmail.com | linkedin.com/in/fadhih | github.com/mdfadhih

SUMMARY

Frontend Developer with 3.5+ years of experience building high-performance, production-grade web applications using React, Next.js, and TypeScript. Delivered measurable business impact by improving page load times by 40%, elevating Lighthouse scores from 62 to 97, and reducing API response display latency by 75%. Skilled in designing scalable component architectures, integrating RESTful APIs, and implementing WCAG accessibility standards. Proficient in state management with Redux and Zustand, CI/CD pipelines using GitHub Actions and Docker, and cloud services on AWS. Security-conscious developer with a Master of Cybersecurity, applying secure authentication patterns, input validation, and API security best practices to frontend development.

SKILLS

Frontend Development: React, Next.js (SSR/SSG/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility

UI/UX & Accessibility: WCAG Compliance, Semantic HTML, ARIA Attributes, Figma Design Handoff, Atomic Design Methodology, Component Libraries

State Management & Testing: Redux, Zustand, Context API, Jest, React Testing Library, Unit Testing, Integration Testing, Test-Driven Development

Performance Optimisation: Core Web Vitals (LCP, CLS, FID), Lazy Loading, Code Splitting, Image Optimisation, Font Preloading, Service Workers, Lighthouse Auditing

Backend & API Integration: Node.js, RESTful API Integration, Asynchronous Data Handling, Error Handling, Caching Strategies, Pagination, Postman

DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, CI/CD (GitHub Actions), Git, Version Control, Automated Deployment

Tools & Methodologies: Jira, Agile/Scrum, Sentry, Code Review, Debugging, Pair Programming

EXPERIENCE

Software Developer (Frontend Engineer)

Monash University, Melbourne | Jul 2023 – Jun 2024

- Optimised Next.js application serving 5,000+ monthly users by implementing lazy loading, code splitting, and Core Web Vitals tuning, reducing page load time by 40% and improving user retention.
- Architected and built a reusable component library of 40+ React/TypeScript components using atomic design methodology, reducing code duplication by 30% and accelerating feature delivery across teams.
- Integrated 15+ RESTful APIs with robust error handling and client-side caching strategies, cutting average response display time from 800ms to 200ms (75% reduction).
- Elevated Lighthouse performance score from 62 to 97 through image Optimisation, font preloading, and service worker implementation, ensuring compliance with Core Web Vitals benchmarks.
- Established automated CI/CD pipeline via GitHub Actions and Docker, achieving 85% test coverage with Jest and React Testing Library, reducing deployment failures by 30%.

Frontend Developer

GrandBiz IT Solutions, Chennai, India | Nov 2020 – Feb 2023

- Developed 8 production web applications using React and JavaScript (ES6+), improving UI responsiveness by 20% through optimised render cycles and component performance tuning.
- Created a shared component library of 25+ reusable UI elements with consistent design patterns, reducing feature development time by 25% across a 5-person Agile team.

- Integrated RESTful APIs handling 10,000+ daily requests with pagination and query Optimisation, reducing latency from 3.2s to 0.4s (87% improvement) and enhancing user experience.
- Reduced production defects by 30% by implementing error boundaries, structured debugging workflows, and Sentry integration for real-time error tracking and monitoring.

TECHNICAL PROJECTS

Serverless Image Tagging Platform | *React, TypeScript, AWS Lambda, API Gateway, S3*

Github: github.com/mdfadhih/Cloud_Based_Image_Storage | *Live Demo:* serverless-image-storage.vercel.app

- Built a full-stack serverless application with React frontend and AWS Lambda backend, reducing image processing time by 30% through asynchronous architecture and optimising data flow.
- Implemented secure file upload using presigned S3 URLs and IAM-based access control, maintaining sub-second upload times while ensuring API security compliance.

Job Search Platform | *React, TypeScript, Python, Mapbox API*

Github: github.com/mdfadhih/GenderEq | *Live Demo*: gendereq.onrender.com

- Developed an interactive job search application with dynamic filtering and Mapbox map visualisation, increasing user engagement by 35%.
- Designed scalable frontend architecture with TypeScript and strict type definitions, reducing runtime errors by 40% and improving cross-team developer productivity.

EDUCATION

Master of Cybersecurity – Monash University, Melbourne (2024)

Bachelor of Science, Web and Mobile Application Development – Murdoch University (2021)

CERTIFICATIONS

AWS Certified Cloud Practitioner | Google Cybersecurity Professional Certificate

Full Work Rights – Available Immediately
